When ready, start the timer and then solve the problems below, entering your choice, A, B, C, D

and pressing for each problem when you are sure of your answer. When complete, stop the timer. You will see problems you got correct in green and incorrect in red. You will receive a score based on how many problems you got right and your time. A perfect score is all problems correct using half the maximum time or less. Text or email your friends with your results.
