

Math Wars – AB Calculus

Scrambled 152 – Limits & Derivatives

Maximum Time: 6.75 Minutes

Directions: To start, you need to download the Math Wars application on your cell phone: Use the QR code or the url:
<https://mastermathmentor.com/mmm/mathwars.ashx?key=152>

When ready, start the timer and then solve the problems below, entering your choice, A, B, C, D and pressing for each problem when you are sure of your answer. When complete, stop the timer. You will see problems you got correct in green and incorrect in red. You will receive a score based on how many problems you got right and your time. A perfect score is all problems correct using half the maximum time or less. You can text or email your friends with your results.

1. (1 pt) If $x^2 - y^2 = 4$, which of the following statements are true?

I. the graph has a horizontal tangent at $(0, 2)$ II. The graph has a vertical tangent at $(2, 0)$

- A. I only B. II only
C. Both I and II D. Neither I nor II

2. (3 pts) The derivative to the inverse of $y = \sin x$ at $x = \frac{1}{2}$ is the same as

- A. $\frac{1}{\cos(2)}$ B. $\frac{1}{\cos(1/2)}$ C. $\frac{1}{\cos(\pi/6)}$ D. $\frac{1}{\cos(\pi/3)}$

3. (5 pts) If $f(x) = a - a^2x$, a a constant, find $f'(a)$

- A. $1 - 2a$ B. $1 - a^2$ C. $-a^2$ D. $-a^3$

4. (7 pts) The 11th derivative of $f(x) = xe^{-x}$ is

- A. $(x-10)e^{-x}$ B. $(10-x)e^{-x}$ C. $(x-11)e^{-x}$ D. $(11-x)e^{-x}$

5. (9 pts) If $f'(x) = (\sin x + 2)\ln(x+2)(1 - e^{x-4})(-2^{x-1})$, then f has which of the following extrema?

- A. Relative minimum at $x = -1$ and relative maximum at $x = 4$
B. Relative maximum at $x = -1$ and relative minimum at $x = 4$
C. Relative minimum at $x = -1$ only
D. Relative minimum at $x = 4$ only
