

My Avg. – 900

■ For $t \geq 0$, $S(t)$ gives the value in dollars of Mr. Dow's stocks where t is measured in days and $t = 0$ refers to the beginning of January, 2017. The best interpretation of $\frac{S'(365) - S'(0)}{365}$

- A) The rate of change of the value of his stock in 2017
- B) The average value of his stock in 2017
- C) The average rate of growth of his stock's value in 2017
- D) The rate in which the growth of his stock's value changed at the end of 2010
